

## How to switch Secure2u to another device

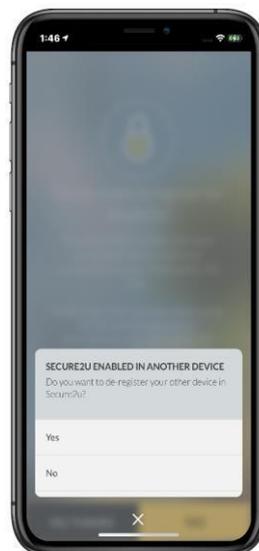

For Maybank2u SG app:

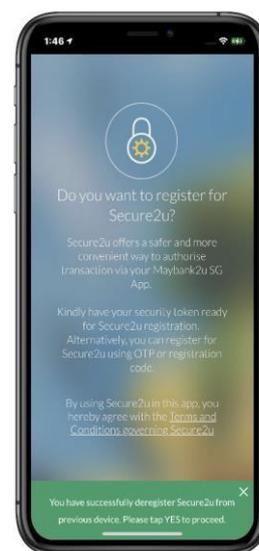

On your new device:  
Under Post Login >  
Settings > Secure2u.

User to tap REGISTER  
if they have received  
the registration code.

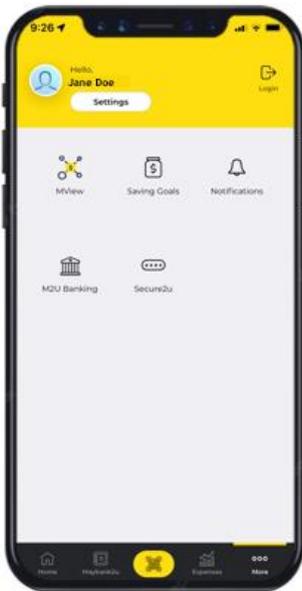

There will be a  
prompt to inform user  
that a previous device  
has been registered  
with S2U. Tap YES to  
deregister the  
previous device.

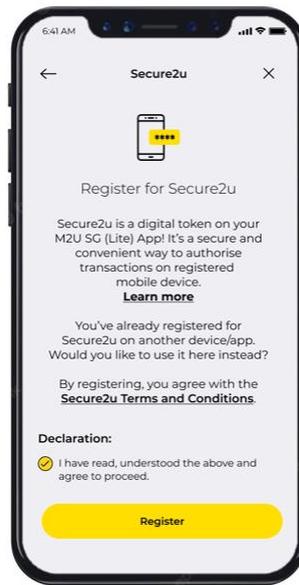

Green sticky bar  
message will be  
shown to indicate that  
S2U has been  
deregistered from  
previous device.

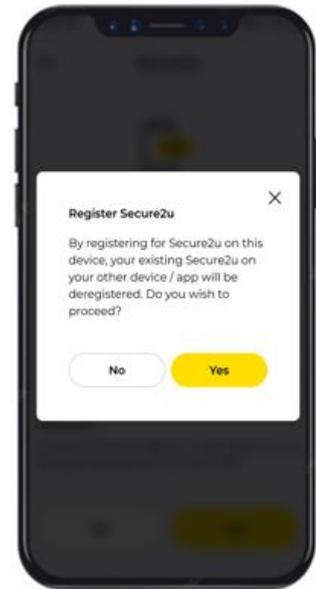

## For M2U SG (Lite) app:

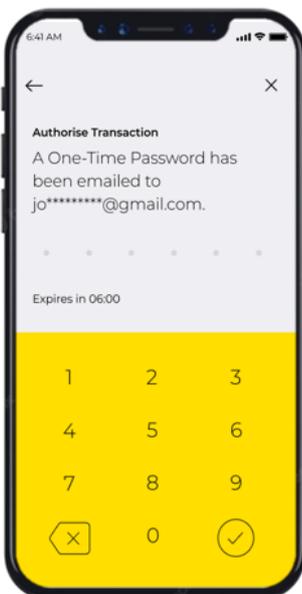

On your new device:  
Under Post Login  
More > Secure2u.

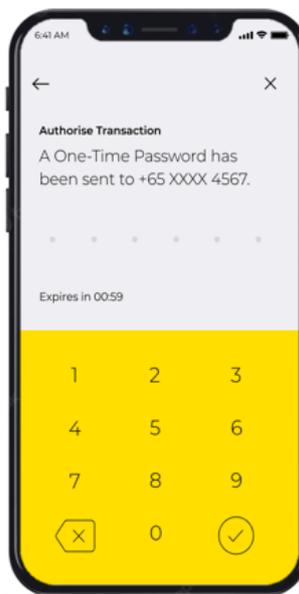

Tap on REGISTER to  
use Secure2u in M2U  
SG (Lite) on the new  
device.

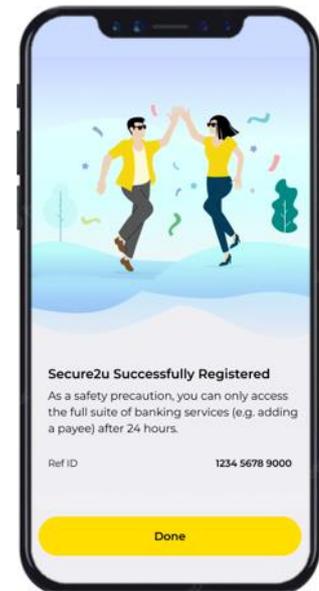

There will be a prompt to  
confirm with user to deregister  
Secure2u in the other device.  
Tap YES to proceed.

User will receive an OTP via  
email. Key in the OTP to  
authorise the transaction.

User will subsequently  
receive an OTP via SMS.  
Key in the OTP to authorise  
the transaction.

User will be informed that  
Secure2u is successfully  
registered on the current  
device.
