

How to approve transactions with Secure2u on Maybank2u SG app

For medium risk transactions such as local transfer of amount more than S\$1,000, Secure2u will authenticate the transaction in the background after you have confirmed the transactions.

Step 2: You will see a loading icon while waiting for S2U to authenticate the transaction in the background.

Authentication is completed and transaction is successful.

For higher risk transactions such as adding payee, increasing transaction limit, local & overseas transfer of amount more than S\$20,000, you will be required to enter your Online Banking password to proceed with Secure2u authentication.

Step 1: Inputs details of payee and review transaction, tap "Confirm" to submit transaction

Step 2: Enter your IB password to proceed with Secure2u authentication.

Authentication is completed and transaction is successful.
