

Global Markets Daily

USD Finding Support

Tariffs Enacted, Retaliatory Blows Thrown

Trump's 25% tariffs on steel and aluminum took effect with no exceptions. Canada and the EU struck back with Canada imposing 25% tariffs on C\$30bn of US -made products starting Thu while the EU also targeted EUR26bn of American imports with effect on 13 Apr. Mexico decided to wait until 2 Apr before announcing measures. Trump pledged to respond to EU's retaliations. EURUSD softened a tad. Later in the session on Wed, US released CPI inflation report - CPI undershot expectations with a 0.2% m/m print vs. previous 0.5%. Core inflation also halved its pace to 0.2% from prev. 0.4%. Year-on-year, core CPI inflation slowed a tad more than expected to 3.1% from previous 3.3%. Breakdown suggests that food inflation had slowed notwithstanding the surge in prices of eggs. Price pressures of medical care, used vehicles, recreation and apparel remained firm while that of airline fares, new vehicles fell. The US inflation report did little for the USD or equities given that it is a pre-trade-war report. USD decline slowed a tad.

CAD Strengthened, As much as AUD

Copper's bullish profile had been taking the AUD higher, allowing the AUDUSD to form a rounding bottom. With trade war between US and EU escalating, the EURAUD downmove seems compelling at this level. Meanwhile, BoC took its policy rate lower by another 25bps to 2.75% in line with consensus (including our own) but Macklem was considerably hawkish, commenting that "BoC will proceed carefully with any further changes" whilst noting that the trade battle with the US a "new crisis". In the statement, the central bank noted that inflation expectations have risen as consumers expect tariffs to increase prices. That could mean that further rate cuts are data-dependent and would face a higher hurdle than cuts thus far. CAD strengthened after the decision.

Data/Events We Watch Today

Data-wise, we EZ industrial production for Jan, China credit data for feb and the US weekly claims.

14 Mar	JP	Outcome of Shunto wage negotiations

AXJ: Events & Market Closure

Date	Ctry	Event
No Significant Event This Week.		

The Trump Trasdacker 2025

Date	Market-Moving Events Since Trump's Inauguration on 20 th Jan 2025	Impact on Markets
20 th Jan	Declares National Energy Emergency, roll back on Biden's climate regulations, enable new O&G development on federal lands	Negative for Oil, Better for Inflation Outlook if crude production expands
27 th Jan	Trump threatened to impose 25% tariff on Columbia but did not do so eventually after Columbia reportedly agreed "to all of President Trump's terms" including the "unrestricted acceptance" of immigrants who entered the US illegally within a few hours of the threat.	DXY clocked the low for Jan that day but headed higher thereafter in anticipation of tariffs on Canada and Mexico.
30 th Jan	Eases Regulations on Crypto-Currency Industry. SEC rescinded an accounting rule (SAB 121) which required banks and FIs to treat cryptocurrencies as a liability on their balance sheet.	Supportive of cryptocurrencies but arguably, great expectations may already be in the price. Last check, bitcoin has been gyrating around \$100,000, within \$90-110K, after rising around 60% since Trump won the elections.
1 st Feb - 3 rd Feb	To impose tariffs on China, Canada and Mexico. Trump had issued executive order on 1st Feb (Sat) under the International Emergency Economic Powers Act to impose 25% tariffs on most goods from Canada and Mexico as well as 10% tariffs on goods from China that will take effect on Tue. Canada's energy and oil exports will be taxed at 10%. On top of that, the US legislators have halted the de minimis provision that allows packages worth under \$800 to be exempted from tariffs. Trump said tariffs on EU goods could happen "pretty soon" while trade issues with the UK can be worked out.	USDCAD and USDMXN rose on 3rd Feb (Mon) before making a complete reversal by the end of the session when it was made known that tariffs on the two countries are to be delayed for a month. USDCAD was up 2.5% from open to high, while USDMXN was up 4.6% during the session.
4 th Feb	Trump wants access to Ukraine's rare earths resources in return for aiding its defence against Russia.	An end to the war in Ukraine would be positive for EUR. However, recent tariff threats are likely to weigh.
4 th Feb	Tariffs on China take effect. Trump mentioned about talks with Xi but in the end, the 10% tariff on China came into effect on 4th Feb. China's Retaliation. Almost immediately, China announced a probe into Google, added several US companies to a "blacklist" of entities, impose new export controls on critical minerals¹. imposed 10% tariffs on US products, including coal, LNG and agricultural equipment with effect from 10 Feb.	USDCNH rose at first when US tariffs on China took effect. China's retaliatory moves were seen as mild and restrained, resulting in some retracements. We suspect that markets are confident that PBoC would continue to defend the yuan for now and this is a reflection of cautious optimism that there could be a quick deal. In addition, China also pledged to take the case to the WTO. Its foreign ministry pointed out that "fentanyl is America's problem".
7 th Feb	Trump said "reciprocal tariffs" that could "affect everyone could be announced the following week.	USD started the week on 10 th Feb stronger in anticipation of it.
9 th Feb	Trump told the press that he would impose 25% tariffs on all steel and aluminium.	
10 th Feb	Trump signed executive orders to order 25% tariffs on all steel and aluminium.	Pro-cyclical AUD, CAD, NZD fell more than G10 and Asian peers this morning.
13 th Feb	Trump announces that talks with Putin for a peace deal with Ukraine will begin.	EUR small rebound, within range.

Note¹: Critical minerals include tungsten, tellurium, bismuth, molybdenum and indium products.

Sources: Bloomberg, various news sources, Maybank FX Research & Strategy

Date	Market-Moving Events Since Trump's Inauguration on 20 th Jan 2025	Impact on Markets
13 th Feb	Trump signs measure directing USTR and commerce secretary to propose new levies on a county-by-country basis. Howard Lutnick said that studies should be completed by 1 Apr and Trump could act immediately after.	DXY declines on hopes that the tariff timeline can provide some leeway for country to country negotiations.
18 th Feb	Trump threatened 25% tariffs on semiconductor, pharmaceuticals and automobiles - "can go substantially higher over the course of a year".	The DXY index rose a tad in reaction.
25 th Feb	Trump orders investigation into national security risks of dependency on copper imports that could lead to tariffs on the product	US copper futures gain but limited reaction in currency markets
27 th Feb	Trump said tariffs on Canada, Mexico will take effect as scheduled, announced another 10% blanket tariff on China for its role in fentanyl flows into the US	USDCAD, USDMXN and USDCNH rose, taking the DXY broadly higher
3 rd Mar	Trump mentioned levies on agriculture imports to take effect on 2 Apr.	
3 rd Mar	Threatened to impose tariffs on Japan and China for keeping their currencies undervalued.	JPY strengthened and pressure on CNY (owed to upcoming tariffs) was mitigated by this recent threat.
3 rd Mar	Trump stopped military aid to Ukraine. Europe and UK plan to ramp up on military spending.	EUR and GBP surge.
4 th Mar	25% tariffs on Canada, Mexico and additional 10% for China take effect. Commerce Secretary Howard Lutnick hinted of a compromise	USDCAD, USDMXN were higher before coming off on Lutnick's comments.
6 th Mar	US gives a one-month delay to Mexico and Canada on auto tariffs whilst also considering tariff exemptions for some agricultural products for these two countries	USDCAD, USDMXN both pullback
7 th Mar	Trump signs an order pausing tariffs on Canadian and Mexican goods compliant with the USMCA deal until 2 Apr. About 62% of Canadian imports and 50% of Mexican products would remain subject to tariffs.	USDCAD, USDMXN falls further
12 th Mar	25% tariffs on steel and aluminium take effect. Canada will impose 25% tariff on C\$30bn of American goods that will take effect on Thu (14 Mar) EU also targeted EUR26bn of American imports with effect on 13 Apr. Mexico said it will wait until 2 Apr before making further announcements.	EURUSD softened a tad. USDCAD is lower.

Sources: Bloomberg, various news sources, Maybank FX Research & Strategy

G10 Currencies

- **DXY Index - Decline Slows.** Trump's 25% tariffs on steel and aluminum took effect with no exceptions. Canada and the EU struck back with Canada imposing 25% tariffs on C\$30bn of US -made products starting Thu while the EU also targeted EUR26bn of American imports. Mexico decided to wait until 2 Apr before announcing measures. Trump pledged to respond to EU's retaliations. EURUSD softened a tad, propping the DXY a tad. Later in the session on Wed, US released CPI inflation report - CPI undershot expectations with a 0.2% m/m print vs. previous 0.5%. Core inflation also halved its pace to 0.2% from prev. 0.4%. Year-on-year, core CPI inflation slowed a tad more than expected to 3.1% from previous 3.3%. Breakdown suggests that food inflation had slowed notwithstanding the surge in prices of eggs. Price pressures of medical care, used vehicles, recreation and apparel remained firm while that of airline fares, new vehicles fell. The US inflation report did little for the USD or equities given that it is a pre-trade-war report. The DXY index was last seen around 103.60. 103.40 (recent Mar low) remains a tentative support. Resistance at 105.00 (200-dma). Beyond 103.40, next support is seen around 102.50. Data-wise, Thu has PPI final demand for Feb before the Mar prelim. Univ. Of Mich. Sentiment on Fri.
- **EURUSD - Bullish Bias.** EURUSD dipped just below the 1.09 figure, last seen at 1.0891 levels. Pair was buoyed by the prospect of a 30-day truce that the US is brokering for Ukraine and Russia. Odds of a ceasefire this year on prediction markets dipped slightly to 77% (prev: 80%) still higher than recent lows of around 70%. The US will take the proposal to Putin to seek his agreement. Thus far, Russia demands that Ukraine remains neutral, limits on its military and to give up its bid to join NATO. Russia also did not want the presence of European troops in Ukraine. There are some cautions by Western security officers that Russia is making "maximalist demands", knowing that they are unacceptable to Ukraine and Europe. As such, the support for the EUR may not sustain for too long. **Focus this week is also on Germany's outgoing parliament debate on the EUR500bn infrastructure fund and radical change to state borrowing rules to fund defence from 13 Mar before the new parliament takes over on 25 Mar. The vote takes place on 18 Mar.** EUR has broken out of earlier range and there could be further near-term upside. For now, we retain a bearish view on the EUR given possible US trade policy, divergent monetary policy and political uncertainty. Following the breakout of the EUR, we see support at 1.0720 (200-dma) followed by the 1.0680 (50% retracement of the Oct-Feb move lower). Resistance level at 1.0960. Week ahead has Jan EZ industrial production (Thu).
- **GBPUSD - Gains Slow.** GBPUSD outperformed the EURUSD and was last at 1.2961 levels. Both the EUR and GBP gained on the prospect of increased defence spending leading to rising yields. The US had earlier called on its NATO allies to increase defence spending to 5% of GDP. Following a public disagreement between the US and Ukraine, the EU and UK have rallied with Macron calling on Europe to increase defence spending to between 3 to 3.5% of GDP. UK currently spends about 2.3% of GDP on defence, just meeting the 2% NATO target. We maintain that the GBP could be better sheltered from any potential Trump action, given the services-oriented nature of the UK economy, a goods trade deficit with the US (4Q 2024) and the close relationship between the US and UK. Recall that the BOE cut rates by 25bps to 4.50%. The MPC voted 7-2 in favour of a 25bps easing, with the 2 dissenting members, Dhingra and Mann preferring a 50bps cut. Mann had been urging for larger rate cuts due to falling consumer demand and job markets. This was a contrast to Chief Economist Huw Pill who sees the need to keep policy restrictive. Expectations for the next BOE meeting are for a stand pat. We see three more cuts for the BOE this year with

the policy rate ending at 3.75%. This is broadly in line with current market pricing although slightly more dovish than the 4.00% that the BOE signalled. Nevertheless, we maintain our view that the GBP could be somewhat sheltered from tariffs as it avoids specific trade action from the Trump administration. On the GBP daily chart, resistance is at 1.3030 and 1.3120 with support at 1.2790. We see bearish divergence on this pair and cable is at risk of pulling back towards 1.2890. Week ahead has BRC Sales for Feb on Tue. Thu has RICS house price bal for Feb. Fri has Jan IP, mfg production and trade.

- **USDCHF - Lower.** USDCHF was last seen around 0.8815. Look for CHF to be supported as a safe-haven in uncertain times. SNB President Schlegel said that rates would only go negative if necessary to keep inflation within the 0 to 2% target band. Recent rally in EUR and GBP could help SNB with keeping inflation within the target band. CHF as a safe-haven should continue to stay resilient as long as tariff fears and threats are still at play. We expect the traditional safe-havens to be better supported on heightened volatility and uncertainty. It could however take some time to catch up with the USD. On the USDCHF chart, resistance is at 0.90 and support is at 0.8690. No further data releases for the week ahead.
- **USDJPY - Bounce Up, Downside Trend Intact.** USDJPY was last seen at 148.26 as it climbed up. The pair saw quite some gyrations overnight as it rose as high as 149.19 before coming back down. The series of contrasting events combined with the pair looking stretched on the downside could have led to the movements yesterday. UST yields climb but 30-year JGB yield did hit the highest level since 2006. There was also the ongoing trade tension among the various parties with Canada and the EU looking to slap the US with tariffs. For the remainder of the week, we continue to await the release of the preliminary results of the Shunto wage negotiations where a strong reading possibly closer or exceeding the 6.00% mark can provide a lift to the JPY. Overall, the downside trend remains intact and we think it would do so even if there maybe interim climbs. We expect the pair to eventually test the key support level at 145.00. The next after that would be the crucial 140.00. Resistance meanwhile is at 150.00 and 155.00. There are no remaining key data releases this week.
- **AUDUSD - Rounding Bottom.** AUDUSD surged overnight and we rather allude this to the copper strength rather than the US CPI report. Copper has been rising in spite of rising growth concerns due to tight supply conditions amid stockpiling activities. AUDUSD rose to levels around and support remains around 0.6270 (50-dma). As long as China does not engage in strong tit-for-tat actions, there is a possibility that pressure on the AUD could be delayed until the start of Apr. We remain cautious for the rest of 1H 2025. AUD is still susceptible to more confrontation between the US and China. Further signs of de-coupling between Australia's traditional ally and biggest trading partner could hurt AUD sentiment in the medium term. The AUDUSD last printed 0.6322. Next support around 0.6720 before 0.6220. Resistance at 0.6350 (100-dma). Data-wise, Thu has consumer inflation expectation for Mar.
- **NZDUSD - Bearish.** NZDUSD rose and was last seen around 0.5730 levels, still within a 0.56 to 0.58 range. Risk-sensitive NZD has been caught in opposing forces - weighed on one hand by tariff threats made on its biggest trading partner - China as well as falling UST yields that widens the carry advantage of the NZD. Broader USD softness had been supporting this pair on dips. With RBNZ's policy already well anticipated, drivers into Mar are likely to be related to Trump's trade policies. AUDNZD has formed a double top. With RBA and RBNZ likely in peak policy divergence, we see downside in the AUDNZD cross, further supported by the bearish technical patterns towards 1.1067, 1.1051 and then at 1.0987 with final target at 1.0940. Last at 1.1086.

- **USDCAD - *Stuck in Range***. Trump's 25% tariffs on steel and aluminum took effect with no exceptions. Canada and the EU struck back with Canada imposing 25% tariffs on C\$30bn of US -made products starting Thu while the EU also targeted EUR26bn of American imports. Trump pledged to respond to EU's retaliations. BoC took its policy rate lower by another 25bps to 2.75% in line with consensus (including our own) but Macklem was considerably hawkish, commenting that "BoC will proceed carefully with any further changes" whilst noting that the trade battle with the US a "new crisis". In the statement, the central bank noted that inflation expectations have risen as consumers expect tariffs to increase prices. That could mean that further rate cuts are data-dependent and would face a higher hurdle than cuts thus far. CAD strengthened after the decision, albeit still stuck within the range of 1.4170–1.4600. Interim support is seen at 1.4350 (50-dma). Data-wise, Thu has building permits for Jan. Fri has mfg sales for Jan.
- **Gold (XAU/USD) - *About to Make Another Record High***. Gold edged higher yesterday in spite of higher yields. The correction in the gold has been small (2.6% from peak) compared to bitcoin (-30%) and we continue to expect buying on dips interest. Bullion was last seen around \$2940 levels, about to break the record high of around \$2945. Regardless, eyes are on the psychological \$3000. The gold metal continues to be supported by concerns on geopolitical conflicts (uncertainty of the trajectory that the war in Ukraine would take and now that Europe is ramping up on defence, there could be greater probability of a conflict). The possibility of more tariffs from Trump on various nations could also be supportive of gold. 3000 is still a psychological resistance before the next at resistance at 3110. We cannot rule out a technical pullback. Support at 2780 before 2730 (21-dma).

Asia ex Japan Currencies

SGDNEER trades around +1.14% from the implied mid-point of 1.3475 with the top estimated at 1.3205 and the floor at 1.3744.

- **USDSGD - Sideways.** USDSGD was last seen at 1.3322 levels this morning. Our economists suggest recent CPI print opens the door for MAS to ease further in Apr. SG Budget 2025 was released earlier with a projected S\$6.8b fiscal surplus (or about 0.9% of GDP). Budget is expansionary even with the healthy surplus. Our economists maintain their growth forecasts at +2.6% (2025) and +2.3% (2026). Vouchers are expected to cushion consumption amid an uncertain global environment. MAS eased for the first time since 2020 (24 Jan 2025) and the market reaction has been rather muted - a possible indication that this move was expected. The move looks to be one that is calculated to be a tad more growth supportive while continuing to hold the reins on inflation. The trade-weighted SGDNEER is at +1.14% above the mid-point this morning and looks to remain supported in line with our expectations. We expect that SGD could be sheltered given the correlation of SG/US rates. Moreover, Singapore is unlikely to be singled out by the US for additional tariffs given that it has a bilateral trade deficit with the US. Regional safe-haven properties are also likely to be supportive for the SGD. MAS policy continues to be supportive of SGD strength and we look for the resilience to continue even with this easing. We do not expect SGDNEER to weaken too much further even with MAS easing (slight slope reduction). In the medium-term, we remain positive on the SGD given robust macro fundamentals and a monetary policy that has an appreciating currency as a default stance. Resistance at 1.3350 and 1.3400. Support at 1.3250. Data releases this week include Feb FX Reserves (Fri).
- **SGDMYR - Higher.** SGDMYR was last at 3.3269 as it traded at the higher end of its recent range. The MYR is consolidating amid global uncertainty whilst the SGD has been more resilient, pushing the cross higher. Resistance at 3.35 and 3.40. Support at 3.29 and 3.27.
- **USDMYR - Sideways.** Pair was last seen higher at 4.4327 and remains within the recent range of 4.40 - 4.50. External developments including those related to the US and China look like it would continue to be the main driver for the MYR. For the coming week, we continue to closely watch the developments related to recession concerns, US tariffs, Europe, US data (Feb CPI) and China. Back on the chart, resistance at around 4.5000 (around 200-dma) and 4.6300. Support at 4.3600. Jan IP data was slower but still fairly robust at 2.1% YoY (est. 2.7% YoY, Dec. 4.6% YoY) whilst the same can be said too of Jan mfg sales at 3.5% YoY (Dec. 5.7% YoY). There are no remaining key data releases this week.
- **1M USDKRW NDF - Sideways, Watching Yoon's saga.** 1M USDKRW NDF was last at around 1449.77 levels this morning. BOK recently cut rates by 25bps to bring its policy rate to 2.75%, largely in line with both the market and our expectations. Decision was unanimous and heralds potentially the start of rate cuts to be more growth supportive, in line with most other central banks globally. BOK maintains a cautious outlook given the highly volatile FX outlook and the potential for upside risks to inflation. However, if the current disinflationary trajectory were to continue, it would not be a surprise for us to see more cuts in the future. President Yoon has been indicted, and elections will need to be held within 60 days should he be removed from office. Yoon's impeachment hearings are ongoing. However, there remains plenty of concerns for the KRW. The political situation is highly uncertain with a snap election likely. Opposition leader Lee Jae-myung had proposed compiling an extra budget worth at least KRW30trn to prop up the economy in the face of headwinds posed by political uncertainties and tariff threats. There also remains risks that the BOK could cut rates in the coming months given the economic concerns. We

see markets are likely to stay cautious too and so are we too amid these concerns on the KRW. For near term, we are watching how both the political and Trump tariff developments pan out. Back on the chart, resistance is at 1440. Support is at 1430 followed by 1420. 4QP GDP was in line at 1.2% YoY (exp: 1.2%; prev: 1.2%) and 0.1% SA QoQ (exp: 0.1%; prev: 0.1%). Full year growth was 2.0% (exp: 2.0%; prev: 2.0%). Remaining data releases this week include Feb bank lending to household (Wed), Feb EPI/IPI (Fri).

- **USDCNH - Testing Lower.** USDCNH hovered around 7.22, pressuring the 7.22-7.30 range. The USDCNY reference rate was fixed higher this morning at 7.1728, albeit in the same direction as the consensus at 7.2433. Gap between the fix and estimate has widened to 705pips from 573pips. USDCNY is now around 0.9% above the fix, drifting lower away from the upper bound in light of the USD decline. There have been opposing forces but generally, the surge in GBP, and EUR had helped to bring the USD lower against most currencies. Yuan is, ironically, in a more benign environment at this point, boosted also by a rather encouraging NPC. The benign USD and US rates environment are thus allowing yuan to be reined in well by the fix. As long as China does not engage in strong tit-for-tat actions, yuan seems to be relatively stable. This cannot be said for CAD. EUR has started to soften as markets take profit on recent rally. EUR sentiment has turned cautious due to retaliations from the EU on tariffs. We suspect the USD would become more supported from here. Trump had already said he would have countermeasures for EU's retaliation. We continue to hold the view that the worst of US-China trade conflict is not here. The US is due to make a decision on China's PNTR status and there could be more tariff adjustments from here. However, it seems that China is not willing to engage in strong tit-for-tat retaliations thus far and that has been keeping the yuan stable. There could come a time when yuan would be allowed to weaken in order to help cushion the impact of excessive tariffs from the US.
- **1M USDIDR NDF - Higher.** 1M USDIDR NDF was last seen at 16479. External developments especially those in relation to the US are likely to remain key drivers for the currency and the wider Asian FX space. We continue to keep an eye on US data (in relation to Fed easing and recession likelihoods), Euro asset movements, trade developments and any China announcements. Meanwhile, on the domestic front, there were a few developments which include that the Indonesian parliament is planning to amend the financial sector omnibus law to incorporate several decision of the constitutional court. This included changes to the budgeting of the Deposit Insurance Agency and investigation procedures of the Financial Services Authority. According to Bloomberg, the parliamentary finance commission has also already met with a number of academics and experts on Tuesday night where lawmakers sought for input on whether a provision detailing BI's objectives were sufficient or needed to be expanded. On other items, Finance Minister Sri Mulyani would be holding the first formal briefing on the government's 2025 fiscal performance today after there had been delay on the release of the budget report numbers. Back on the chart, support at 16200 and 16000. Resistance is at 16600 and 16750. There are no remaining data releases this week.
- **1M USDPHP NDF - Sideways, Cautious.** The 1M USDPHP NDF was last seen at 57.41 as it continued to trade at levels similar to prior sessions. External developments especially those in relation to the US are likely to remain key drivers for the currency and the wider Asian FX space. We continue to keep an eye on US data (in relation to Fed easing and recession likelihoods), Euro asset movements, trade developments and any China announcements. Back on the chart, support at 57.00 and 56.00. Resistance is at 58.50 and 59.50 around the recent Dec high). We are staying cautious on the 1M NDF

given the uncertain macro situation. There are no key data releases this week.

- **USDTHB - Sideways, Cautious.** Pair was last seen at 33.78 as it remained within a range of about 33.50 - 34.50. We are staying cautious on the USDTHB, and see that it could remain within that range for now given the global uncertainties. Ongoing trade tensions between Trump and various countries does not help for the THB given Thailand's large trade exposure. Thailand is also vulnerable to US reciprocal tariffs whilst the THB has quite a high sensitivity to the CNH. US recessions risks can also weigh on appetite towards the EM space. Meanwhile, Finance Minister Pichai Chunhavanjira has said that Thailand aims to boost long-term GDP growth to be above 3% as they see that the country's potential growth is in a range of 3% - 3.5%. Back on the chart, resistance is at 34.50 and 35.00. Support at 33.50 and 33.00. Key data releases this week include Feb consumer confidence (Thurs) and 7 Mar gross international reserves/forward contracts (Fri).
- **1M USDINR NDF- Steady.** USDINR 1M NDF was last seen at 87.44 levels. Feb CPI Inflation in India eased to a seven-month low at 3.61% YoY (exp: 3.98%; prev: 4.30%). This should provide RBI with the space to cut rates further. RBI Chief has hinted at some willingness to allow more flexible currency moves. There was likely some RBI intervention earlier as INR rallied by about 1.2%. Some have suggested that the RBI has been less interventionist under new governor Sanjay Malhotra, but this episode is evidence to the contrary. RBI could be trying to draw a line in the sand, with INR weakness pretty much a one-way street since Trump's election win. RBI's latest bout of intervention could necessitate a further injection of liquidity into INR money markets. Modi has already sought to directly engage Trump as India also warms ties with China with the resumption of direct flights between the two countries resuming in late Jan. Both countries could be aware of the potential mutual benefit from close collaboration amid a more challenging and uncertain external environment. Growth support is likely to be a major concern for the RBI, as more generally central banks have shown a preference to opt to be more growth supportive and are generally less worried about inflation. INR could face some near-term pressures as expectations of easing build, although it remains one of the more sheltered against the impact of US tariffs. Also contrary to what some might suggest, we think RBI maintains a relatively tight grip on the INR Resistance at 88.00. Support at 87.00. Data this week includes Feb trade data (13 - 17 Mar) and 7 Mar foreign exchange reserves (13 - 14 Mar).
- **USDVND - Supported on Dips.** USDVND was last seen around 25467. Pair has been trading within 25430-25600 range. The reference rate was fixed at 24758, unchanged from previous. EUR, GBP, JPY and to some extent CNH gains have been able to bring the USD lower. A range seems to be established recently within 25430-25600. Resistance at 25600 before the next at 25800. Support around 25370.

*Indicative levels

**Daily Trade Data: 1) Government bonds and 2) PDS/corporate bonds

- Ringgit bond market saw a healthy buying session for both MGS and GII. Slightly more buying took place in the morning session with the short to mid-tenors shedding 1bp in yields. For the GII 3/54 re-opening, the WI was last seen at 4.185/170.
- MYR IRS bucked recent trend and inched higher by 1-3bp, with USTs retreated overnight following Trump dialled back double levies on Canadian steel and aluminium as well as downplayed risk of tariff-led recession. Nevertheless, the upticks on MYR IRS were limited amid sustained buying interest in MGS/MGII. 3M KLIBOR was unchanged at 3.66%. 2y IRS dealt at 3.48% and 3.475%.
- The PDS market turned quieter. GG space saw Pengurusan Air SPV and Prasarana trading rangebound. In AAA, PLUS long-tenor bonds continued to see better buying, narrowing the spreads by 1bp in sizeable amount. ALR 10/29 traded 4bp lower in yield for MYR40m. Another notable trade was JCorp 6/27 which saw MYR150m changing hands for 3bp lower. In AA3/AA-, EcoWorld Cap 10/27 spread tightened 1bp.

* Source: Bloomberg, Maybank Indonesia

- Most Indonesian short-medium tenors of government bonds weakened yesterday. On the other side, Indonesian long tenor of government bonds strengthened due to their attractiveness of high yields. We suspected that a weakening on Indonesian government bonds is driven by the global investors took momentum for applying “profit taking strategy” due to negative environment on global financial markets. From the local side, it seemed that the global investors can’t patiently wait current Indonesian economic progress under the new government by President Prabowo Subianto. Both Morgan Stanley and Goldman Sachs downgraded investment ratings for Indonesian investment assets. However, the credit rating agency, Fitch Ratings, kept retaining Indonesian BBB credit rating status with stable outlook.
- However, we saw a weakening pressures on Indonesian bond market after seeing the latest cooling result on the U.S. CPI inflation from 3.0% YoY in Jan-25 to be 2.8% YoY in Feb-25. It opens again an opportunity for the Fed to consider applying loosening monetary rate (although it also depends on the impact of the Trump’s imported goods tariffs hike since April 2025 for Canada and Mexico). Then, investors also received positive news on latest Indonesian fiscal result for early this year. The government is still capable to manage its fiscal position on early this year, as shown by relative low fiscal deficit ratio by 0.1% of GDP in Jan-25 with positive fiscal balance by Rp10.61 trillion amidst a sharp drop on its tax revenue. We expect the investors to begin applying “buy” strategy again for Indonesian bond market.

DISCLAIMER

This report is for information purposes only and under no circumstances is it to be considered or intended as an offer to sell or a solicitation of an offer to buy the securities or financial instruments referred to herein, or an offer or solicitation to any person to enter into any transaction or adopt any investment strategy. Investors should note that income from such securities or financial instruments, if any, may fluctuate and that each security's or financial instrument's price or value may rise or fall. Accordingly, investors may receive back less than originally invested. Past performance is not necessarily a guide to future performance. This report is not intended to provide personal investment advice and does not take into account the specific investment objectives, the financial situation and the particular needs of persons who may receive or read this report. Investors should therefore seek financial, legal and other advice regarding the appropriateness of investing in any securities and/or financial instruments or the investment strategies discussed or recommended in this report.

The information contained herein has been obtained from sources believed to be reliable but such sources have not been independently verified by Malayan Banking Berhad and/or its affiliates and related corporations (collectively, "Maybank") and consequently no representation is made as to the accuracy or completeness of this report by Maybank and it should not be relied upon as such. Accordingly, no liability can be accepted for any direct, indirect or consequential losses or damages that may arise from the use or reliance of this report. Maybank and its officers, directors, associates, connected parties and/or employees may from time to time have positions or be materially interested in the securities and/or financial instruments referred to herein and may further act as market maker or have assumed an underwriting commitment or deal with such securities and/or financial instruments and may also perform or seek to perform investment banking, advisory and other services for or relating to those companies whose securities are mentioned in this report. Any information or opinions or recommendations contained herein are subject to change at any time, without prior notice.

This report may contain forward looking statements which are often but not always identified by the use of words such as "anticipate", "believe", "estimate", "intend", "plan", "expect", "forecast", "predict" and "project" and statements that an event or result "may", "will", "can", "should", "could" or "might" occur or be achieved and other similar expressions. Such forward looking statements are based on assumptions made and information currently available to us and are subject to certain risks and uncertainties that could cause the actual results to differ materially from those expressed in any forward looking statements. Readers are cautioned not to place undue relevance on these forward looking statements. Maybank expressly disclaims any obligation to update or revise any such forward looking statements to reflect new information, events or circumstances after the date of this publication or to reflect the occurrence of unanticipated events.

This report is prepared for the use of Maybank's clients and may not be reproduced, altered in any way, transmitted to, copied or distributed to any other party in whole or in part in any form or manner without the prior express written consent of Maybank. Maybank accepts no liability whatsoever for the actions of third parties in this respect. This report is not directed to or intended for distribution to or use by any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation.

APPENDIX I: TERMS FOR PROVISION OF REPORT, DISCLAIMERS AND DISCLOSURES

DISCLAIMERS

This research report is prepared for general circulation and for information purposes only and under no circumstances should it be considered or intended as an offer to sell or a solicitation of an offer to buy the securities referred to herein. Investors should note that values of such securities, if any, may fluctuate and that each security's price or value may rise or fall. Opinions or recommendations contained herein are in form of technical ratings and fundamental ratings. Technical ratings may differ from fundamental ratings as technical valuations apply different methodologies and are purely based on price and volume-related information extracted from the relevant jurisdiction's stock exchange in the equity analysis. Accordingly, investors' returns may be less than the original sum invested. Past performance is not necessarily a guide to future performance. This report is not intended to provide personal investment advice and does not take into account the specific investment objectives, the financial situation and the particular needs of persons who may receive or read this report. Investors should therefore seek financial, legal and other advice regarding the appropriateness of investing in any securities or the investment strategies discussed or recommended in this report.

The information contained herein has been obtained from sources believed to be reliable but such sources have not been independently verified by Maybank Investment Bank Berhad, its subsidiary and affiliates (collectively, "Maybank IBG") and consequently no representation is made as to the accuracy or completeness of this report by Maybank IBG and it should not be relied upon as such. Accordingly, Maybank IBG and its officers, directors, associates, connected parties and/or employees (collectively, "Representatives") shall not be liable for any direct, indirect or consequential losses or damages that may arise from the use or reliance of this report. Any information, opinions or recommendations contained herein are subject to change at any time, without prior notice.

This report may contain forward looking statements which are often but not always identified by the use of words such as "anticipate", "believe", "estimate", "intend", "plan", "expect", "forecast", "predict" and "project" and statements that an event or result "may", "will", "can", "should", "could" or "might" occur or be achieved and other similar expressions. Such forward looking statements are based on assumptions made and information currently available to us and are subject to certain risks and uncertainties that could cause the actual results to differ materially from those expressed in any forward looking statements. Readers are cautioned not to place undue relevance on these forward-looking statements. Maybank IBG expressly disclaims any obligation to update or revise any such forward looking statements to reflect new information, events or circumstances after the date of this publication or to reflect the occurrence of unanticipated events.

Maybank IBG and its officers, directors and employees, including persons involved in the preparation or issuance of this report, may, to the extent permitted by law, from time to time participate or invest in financing transactions with the issuer(s) of the securities mentioned in this report, perform services for or solicit business from such issuers, and/or have a position or holding, or other material interest, or effect transactions, in such securities or options thereon, or other investments related thereto. In addition, it may make markets in the securities mentioned in the material presented in this report. One or more directors, officers and/or employees of Maybank IBG may be a director of the issuers of the securities mentioned in this report to the extent permitted by law.

This report is prepared for the use of Maybank IBG's clients and may not be reproduced, altered in any way, transmitted to, copied or distributed to any other party in whole or in part in any form or manner without the prior express written consent of Maybank IBG and Maybank IBG and its Representatives accepts no liability whatsoever for the actions of third parties in this respect.

This report is not directed to or intended for distribution to or use by any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation. This report is for distribution only under such circumstances as may be permitted by applicable law. The securities described herein may not be eligible for sale in all jurisdictions or to certain categories of investors. Without prejudice to the foregoing, the reader is to note that additional disclaimers, warnings or qualifications may apply based on geographical location of the person or entity receiving this report.

Malaysia

Opinions or recommendations contained herein are in the form of technical ratings and fundamental ratings. Technical ratings may differ from fundamental ratings as technical valuations apply different methodologies and are purely based on price and volume-related information extracted from Bursa Malaysia Securities Berhad in the equity analysis.

Singapore

This report has been produced as of the date hereof and the information herein may be subject to change. Maybank Research Pte. Ltd. ("MRPL") in Singapore has no obligation to update such information for any recipient. For distribution in Singapore, recipients of this report are to contact MRPL in Singapore in respect of any matters arising from, or in connection with, this report. If the recipient of this report is not an accredited investor, expert investor or institutional investor (as defined under Section 4A of the Singapore Securities and Futures Act 2001), MRPL shall be legally liable for the contents of this report.

Thailand

Except as specifically permitted, no part of this presentation may be reproduced or distributed in any manner without the prior written permission of Maybank Securities (Thailand) Public Company Limited. Maybank Securities (Thailand) Public Company Limited ("MST") accepts no liability whatsoever for the actions of third parties in this respect.

If you are an authorised recipient, you hereby tacitly acknowledge that the research reports from MST Research are first produced in Thai and there is a time lag in the release of the translated English version.

The disclosure of the survey result of the Thai Institute of Directors Association ("IOD") regarding corporate governance is made pursuant to the policy of the Office of the Securities and Exchange Commission. The survey of the IOD is based on the information of a company listed on the Stock Exchange of Thailand and the market for Alternative Investment disclosed to the public and able to be accessed by a general public investor. The result, therefore, is from the perspective of a third party. It is not an evaluation of operation and is not based on inside information. The survey result is as of the date appearing in the Corporate Governance Report of Thai Listed Companies. As a result, the survey may be changed after that date. MST does not confirm nor certify the accuracy of such survey result.

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, MST does not confirm, verify, or certify the accuracy and completeness of the assessment result.

US

This third-party research report is distributed in the United States ("US") to Major US Institutional Investors (as defined in Rule 15a-6 under the Securities Exchange Act of 1934, as amended) only by Wedbush Securities Inc. ("Wedbush"), a broker-dealer registered in the US (registered under Section 15 of the Securities Exchange Act of 1934, as amended). All responsibility for the distribution of this report by Wedbush in the US shall be borne by Wedbush. This report is not directed at you if Wedbush is prohibited or restricted by any legislation or regulation in any jurisdiction from making it available to you. You should satisfy yourself before reading it that Wedbush is permitted to provide research material concerning investments to you under relevant legislation and regulations. All U.S. persons receiving and/or accessing this report and wishing to effect transactions in any security mentioned within must do so with: Wedbush Securities Inc. 1000 Wilshire Blvd, Los Angeles, California 90017, +1 (646) 604-4232 and not with the issuer of this report.

UK

This document is being distributed by Maybank Securities (London) Ltd ("MSUK") which is authorized and regulated, by the Financial Conduct Authority and is for Informational Purposes only. This document is not intended for distribution to anyone defined as a Retail Client under the Financial Services and Markets Act 2000 within the UK. Any inclusion of a third party link is for the recipients convenience only, and that the firm does not take any responsibility for its comments or accuracy, and that access to such links is at the individuals own risk. Nothing in this report should be considered as constituting legal, accounting or tax advice, and that for accurate guidance recipients should consult with their own independent tax advisers.

OTHERS

Analyst Certification of Independence

The views expressed in this research report accurately reflect the analyst's personal views about any and all of the subject securities or issuers; and no part of the research analyst's compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in the report.

Reminder

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct its own analysis of the product and consult with its own professional advisers as to the risks involved in making such a purchase.
